

Flexitanks are designed for transportation of liquids in 20 ft containers.

An integrated harness:

- prevents the liquid from moving
- removes risk of container damage
- reduces hydrostatic forces
- safer transport on road, ship and rail

Flexitanks – Liquid Logistics Solutions

TNL International are capable of shipping a wide range of liquid types, including wine, edible oils, olive oil, sunflower oil, lactic acid, palm oils, fruit concentrates, printing ink, sorbitol, paraffins, and much more.

Designed to improve the transportation of food-grade and non-hazardous liquids, our self-supporting flexitank offers many advantages. Instead of a bulkhead, it has an integrated harness that works to prevent the liquid from splashing around inside the shipping container.

- **Flexitanks ranging from 20,000 – 27,000 litres in stock**
- **Custom sizes available**
- **Fast heating capability with option of heater pads**
- **Dual flexitanks (two products in one container)**
- **Reefer flexitanks (refrigerated container insulated walls)**
